

RollMatic Rolling Grille

Compact design, optimal for store grilles in confined spaces

Convincing technology

Details perfectly matched to each other

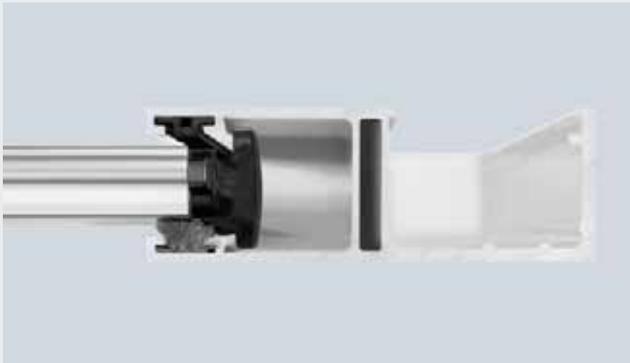

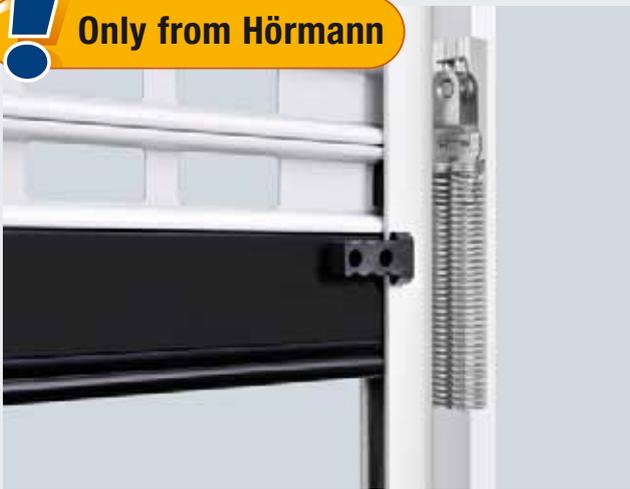

Compact design in two curtain variants

Thanks to its compact design with a max. required headroom or fitting depth of 335 mm, the new RollMatic rolling grille is the ideal solution for store grilles in confined spaces.

Two curtain variants can be selected. Both versions are available in a milled or bright-rolled finish, or many RAL colours. Find the perfect rolling grille colour for a harmonious overall appearance.

Only from Hörmann

Lockable bottom profile

Shootbolt

Manually operated or with operator

Operated via pull chain or pull cord with manual operation, or automatically with an operator. Thanks to the standard power limit, neither a closing edge safety device nor a lintel trap guard is required. The operator is integrated in the shaft cover for a compact design. The required sideroom for the door is only 100 mm or 200 mm on the operator side.

Reliable and safe

Proven tension spring technology ensures easy manual operation of the door. On doors with operators, this technology supports the operator during opening and closing. Double cabling additionally protects the door from crashing to the floor.

Break-in-resistant fastening

The standard extraction retainers on the sides of the curtain reliably hold the door in the side guide. They protect against break-in attempts that involve pushing the rolling grille curtain out of the side guides.

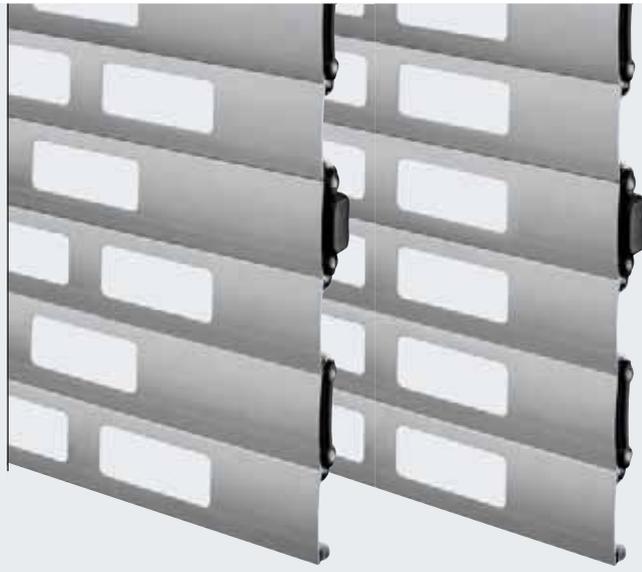

Securely locked

Manually operated rolling grilles can be securely locked using a lockable bottom profile with profile cylinder, which can be actuated from the interior or exterior. Alternatively, the grille can also be locked using a shootbolt. For doors with operators, the operator prevents the curtain from opening. Additional security is also provided by the lockable bottom profile and the shootbolt.

HG-L, lightweight and compact aluminium

The elegant and space-saving aluminium version is particularly suitable for use in shopping arcades. We offer bright-rolled or powder-coated surface finishes.

HG 75, aluminium

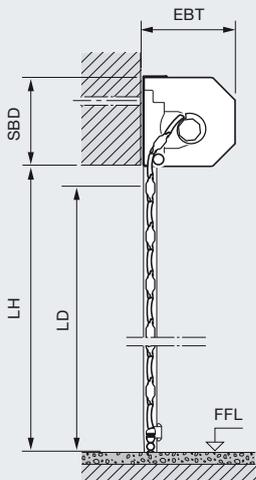

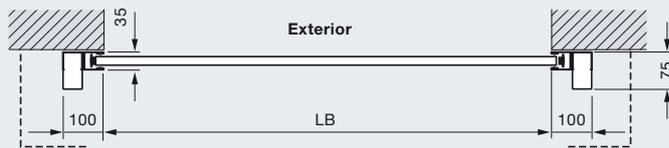

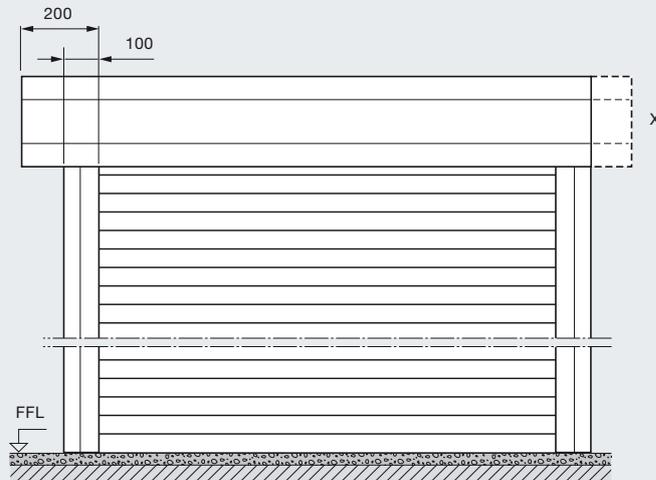

The extruded aluminium profiles are available in a milled or power-coated surface finish. The 100 × 40 mm square holes can be provided in a straight or offset arrangement.

Curtain type	HG-L	HG 75
Size range		
Width up to	4000 mm	4000 mm
Height up to	3100 mm	3000 mm
Material	Aluminium	Aluminium
Surfaces without colour coating	Bright-rolled	Mill-finished
Surfaces with colour coating	RAL colour coating to choose	RAL 9016, RAL 7035, RAL 9006, RAL 5011, RAL 8028, RAL 7016, RAL 9005
Own weight Curtain	Approx. 6.5 kg/m ²	Approx. 6.5 kg / m ²

Fitting dimensions / size ranges

RollMatic Rolling Grille

Fitting behind the opening

Explanation of dimensions

- LB Clear width = ordering size
- LH Clear height = ordering size
- LD Clear passage
- EBT Fitting depth
- SBD Required headroom

Fitting depth EBT

- Up to 2300 mm door height 290 mm
- From 2301 mm door height 335 mm

Required headroom SBD

- Up to 2300 mm door height 290 mm
- From 2301 mm door height 335 mm

Clear passage LD

- Width LB
- Height (with operator) LH - 70 mm
- Height (manually operated) LH - 125 mm
- Height (with lockable bottom profile or shootbolt) LH - 125 mm

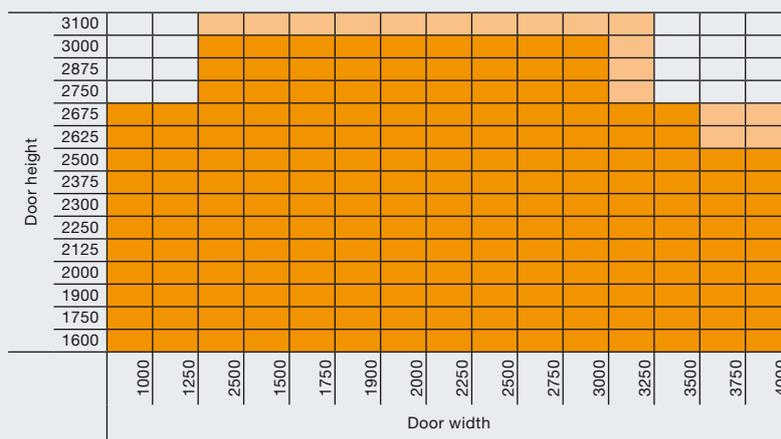

Side space requirement

- 100 mm
- Operator side 200 mm

X Shaft cover

A symmetrical arrangement is also possible, in addition to a variable operator position (as standard on the left, optionally on the right) with projection of the shaft cover on the operator side.

Size range

- Size range for HG 75
- Size range for HG-L
